## Presentation Types

### Free Communications

Authors of the most highly ranked abstracts assessed by a selected panel of abstract reviewers are invited to provide a short oral presentation during the appropriate thematic sessions.

The authors will have 5 minutes for presentation + 2 minutes for discussion. Presenting authors will receive all technical information and details prior to the Congress.

**Registration Note:** at least one author (the first or the presenting author) must register for the Congress within one month of having received notification of acceptance. The abstract will otherwise be withdrawn from the program.

### Posters

Abstracts selected for posters will be presented as paper Posters during the Congress and will be available for viewing in the Poster area. All Posters must be submitted electronically through the Congress Secretariat website. Authors will receive an e-mail from the Congress Secretariat with all technical information and details prior to the event.

## Requirements

### Abstract Body Format

Must be 300 words or less, inclusive of title, author(s) name(s), institutional affiliation(s) and references. Please, do not use abbreviations unless defined in the abstract. All submissions should be in Microsoft Word format. Content should include the following sections:

### Background and Aims

Include one or two sentences to introduce the broad topic area and provide a reason for the study. Provide a clear statement of the aims of the study. A hypothesis could be included in this section.

### Methods

In this section information on participants (and/or subjects) should be provided. This may include the number of participants, demographic information such as age and gender as well as the method of recruitment (i.e. a random sample or a convenient sample). Study inclusion and exclusion criteria should be included in this section as well as a sample size calculation if presenting a randomised clinical trial. Measures and procedures used in the study are described in this section. Descriptions of analyses appear in the methods section.

### Results

The purpose of the result section is to provide a description of the main findings of the study. Submitted abstracts must include actual results. Results should be expressed as means or medians and the spread of the results indicated as ranges, standard deviations or 95% confidence intervals as appropriate.

### Conclusions

In this section you should provide statements of interpretation and implication of findings, as well as comparison with previous literature. It should not be a simple restatement of the results.

All abstracts will be reviewed by the abstract Review Committee within eight weeks after the closing date.
